

Overview

Investment of State of Nevada General Portfolio funds is a function performed by the State Treasurer, who, by the provisions of State statute, has adopted guidelines for the prudent investment of these funds. The General Portfolio encompasses governmental, proprietary, and fiduciary funds of the State. Investment objectives include safety of principal, portfolio liquidity, and market return, which are consistent with a conservative, moderate duration portfolio of securities.

Investment Guidelines

The permissible investments of the General Portfolio include United States Treasury and Agency securities, repurchase agreements, high quality corporate notes and commercial paper, negotiable certificates of deposit, municipal bonds, and banker's acceptances. These securities are diversified to prevent over-concentration in a specific maturity, a specific issuer, or a specific class of securities. The targeted duration of the portfolio is one and a half years, with no single security extending longer than ten years.

The State Treasurer maintains a conservative, moderately active investment strategy. Cash flow forecasts are prepared to identify operating cash requirements that can be reasonably anticipated. In order to maintain sufficient liquidity, a portion of the portfolio is structured so that securities mature concurrent with cash needs in the short- and medium-term. Monies deemed to have a longer investment horizon are invested to take advantage of longer-term market opportunities.

Performance

The suggested benchmark monitors the weekly General Portfolio yield against the six-month U.S. Treasury Bill's average yield over the last six month period (Rolling six-month T-Bill). As of June 30, 2014, the General Portfolio yield was .42% and the outperformance of the benchmark was 37 basis points.

Market Conditions

GDP growth in the first quarter of 2014 was revised downward to -2.9%. Most of the downward revision was attributable to weaker consumer spending, although weaker exports and stronger imports also were contributing factors, in addition to less spending on healthcare than previously estimated. U.S. employers added 288,000 jobs in June, which is a sign of strength in the labor market. The gains mark the fifth consecutive month that payrolls grew by more than 200,000, a streak unmatched since the late 1990s. The unemployment rate dropped to 6.1%, the lowest level since September 2008.

New Fed Chairman Janet Yellen began appearing in front of various groups in 2014 and seemed to be telegraphing that hikes to the Fed Funds rate will finally begin sometime in 2015, as long as trends continue. The Fed continues to taper off its bond purchase program by roughly \$10 billion per month; as a result, the quantitative easing program is expected to end this year. Risks to a Fed tightening scenario include slower employment growth, ultra-low core inflation readings, a slowdown in housing, and geopolitical risk. Bond yields have inched upward, with the 2-year Treasury yield now between 0.45% and 0.50%, and 5-year yields between 1.61% to 1.75%.

HISTORICAL GENERAL PORTFOLIO YIELD

ROLLING 6 MONTH T-BILL YIELD VS. GENERAL PORTFOLIO YIELD

Administration

The State Treasurer has adopted an Investment Policy relating specifically to the General Portfolio. The State Board of Finance shall review and approve or disapprove the policies established by the State Treasurer for investment of money of the State at least every four months. The State Treasurer hereby confirms all General Portfolio investments are in compliance with the Terror-Free Investment Policy and the Divestiture Policy. The General Portfolio may be audited at any time, either internally or externally. A copy of the detailed investment portfolio holdings is available upon request or at the State Treasurer's website at: <https://nevadatreasurer.gov/StatePortfolios.htm>.

Undistributed General Fund Interest Revenue <i>(retained for Treasurer's assessment and General Fund's portion of Lehman amortization)</i>	112,809	342,759	231,111	342,759	1,029,439
<u>Interest Distribution for All Funds (Cash Basis)</u>					
All Funds Interest Collected	603,241	2,372,708	1,235,366	3,123,284	7,334,599
All Funds Interest Revenue - Distributed	167,701	1,331,522	452,424	2,051,071	4,002,717
Undistributed Interest Revenue (see Note 2) <i>(retained for Lehman amortization)</i>	435,539	1,040,986	783,609	1,072,211	3,332,346
Cumulative Undistributed Interest Revenue (see Note 2)	23,256,992	24,297,978	25,080,918	26,153,129	26,153,129

Note 1 Interest is distributed to statutorily approved funds and budget accounts based on the cash basis of accounting. Under the cash basis of accounting, earnings are distributed in the quarter received but not necessarily in the quarter they were earned. Therefore, some of the receipts included in the Actual General Fund interest collected line were actually earned in the prior period and some of the earnings included in the General Fund interest revenue - accrual basis line will not be collected until a subsequent period.

Note 2 Lehman Brothers Holdings, Inc. (LBHI) filed for Chapter 11 bankruptcy protection on September 15, 2008. On December 6, 2011, LBHI won approval from the US Bankruptcy court for a proposed reorganization plan. As a creditor, the State will receive future distributions over several years. The expected amount of recovery is 30-33 cents, but the actual amount to be distributed will be determined based in part on the actual liquidation proceeds. To date, LBHI has made the following distributions. In order to smooth the loss out for the affected agencies, we are amortizing the expected loss over a multi-year period. The undistributed amount is the amount of the possible loss allocable to funds for that period.

	\$50,000,000	\$880,000	Total
Date	Bond	Bond	Distribution
4/17/12	\$ 3,002,422	\$ 53,193	\$ 3,055,615
10/1/12	\$ 1,909,764	\$ 33,835	\$ 1,943,598
4/4/13	\$ 2,489,944	\$ 44,113	\$ 2,534,057
10/3/13	\$ 2,874,372	\$ 20,841	\$ 2,895,212
4/3/14	\$ 3,190,056	\$ 50,924	\$ 3,240,980
	\$ 13,466,557	\$ 56,517	\$ 13,669,462

Note 3 On July 10, 2014, the State Treasurer's Office sold the State's positions in the two Lehman bonds totalling \$50.88 million in par. The total proceeds of the sale were \$10,010,384.

Overview

The State of Nevada Local Government Investment Pool (LGIP) was established as an alternative investment program to be utilized by local governments for their public funds. This program's operation is the responsibility of the State Treasurer who, by the provisions of state statute, has adopted guidelines for the prudent investment of these pooled funds. Any local government, as defined by NRS 354.474, may deposit its public monies into this fund for purposes of investment. As of June 30, 2014, there were 86 members of the LGIP, which includes cities, counties, school districts, and various special districts. The LGIP's foremost investment objectives include safety of principal, portfolio liquidity, and market return, which are consistent with a conservative, short duration portfolio.

Investment Guidelines

The permissible investments of the LGIP include United States Treasury and Agency securities, repurchase agreements, high quality commercial paper, negotiable certificates of deposit, municipal bonds and banker's acceptances. These securities are diversified to prevent over-concentration in a specific maturity, a specific issuer, or a specific class of securities. The average maturity of the portfolio must not exceed 150 days, and no single security may be longer than two years.

The State Treasurer maintains a conservative investment strategy, which incorporates the matching of maturing securities to the cash needs of the participants. Approximately 10% of the fund matures on a daily basis, ensuring sufficient liquidity to meet both anticipated and unanticipated withdrawals. Additionally, at least 50% of the fund will mature within 90 days to minimize risks that market value of securities will significantly fall due to adverse changes in general interest rates.

Performance

The suggested benchmark monitors the weekly LGIP portfolio yield against the 90 day U.S. Treasury Bill's average yield over the last three month period (Rolling 90 day T-bill). As of June 30, 2014, the LGIP's portfolio yield was .09% and the outperformance of the benchmark was 7 basis points.

Market Conditions

GDP growth in the first quarter of 2014 was revised downward to -2.9%. Most of the downward revision was attributable to weaker consumer spending, although weaker exports and stronger imports also were contributing factors, in addition to less spending on healthcare than previously estimated. U.S. employers added 288,000 jobs in June, which is a sign of strength in the labor market. The gains mark the fifth consecutive month that payrolls grew by more than 200,000, a streak unmatched since the late 1990s. The unemployment rate dropped to 6.1%, the lowest level since September 2008.

New Fed Chairman Janet Yellen began appearing in front of various groups in 2014 and seemed to be telegraphing that hikes to the Fed Funds rate will finally begin sometime in 2015, as long as trends continue. The Fed continues to taper off its bond purchase program by roughly \$10 billion per month; as a result, the quantitative easing program is expected to end this year. Risks to a Fed tightening scenario include slower employment growth, ultra-low core inflation readings, a slowdown in housing, and geopolitical risk

Short-term yields remain very low with overnight rates still near 0.01% and even one-month yields below 0.03%. Intermediate bond yields have inched upward, with the 2-year Treasury yield now between 0.45% and 0.50%. We would not expect to see money-market yields (13 months and less) to steepen until probably mid-2015, when conjecture regarding the timing of the Fed's hikes to the Fed Funds rate will likely intensify.
