## INVESTMENTS

GENERAL PORTFOLIO

FISCAL YEAR 2022  
Period Ending  
March 31, 2022

### Overview

Investment of the State of Nevada General Fund Portfolio is a function performed by the State Treasurer, who, by the provisions of NRS 355, has adopted policies for the prudent and conservative investment of these funds. The General Portfolio encompasses governmental, proprietary, enterprise and fiduciary funds of the State. Investment objectives include safety of principal, portfolio liquidity and market return.

### Investment Guidelines

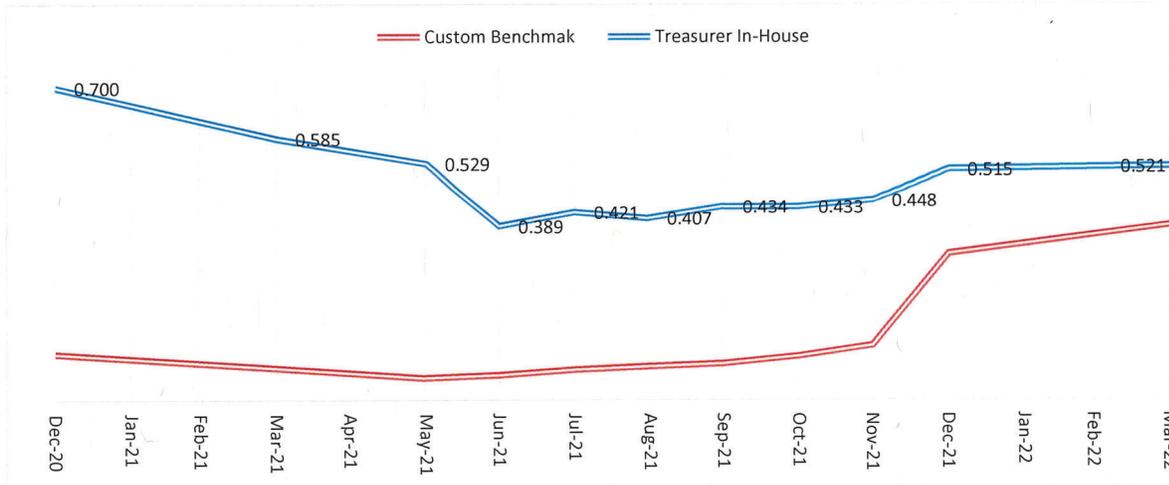

The permissible investments of the General Portfolio include United States Treasury and Agency securities, repurchase agreements, high quality corporate notes and commercial paper, negotiable certificates of deposit, foreign notes, international development notes, asset-backed securities, municipal bonds and banker's acceptances. These securities are diversified to prevent over-concentration in a specific maturity, a specific issuer, or a specific class of securities. The targeted duration of the portfolio is one and a half years, with no security extending longer than ten years.

The State Treasurer maintains a conservative, moderately active investment strategy. Cash flow forecasts are prepared to identify operating cash requirements that can be reasonably anticipated. In order to maintain sufficient liquidity, a portion of the portfolio is structured so that securities mature concurrently with cash needs in the short and medium term. Monies deemed to have a longer investment horizon, are invested to take advantage of longer term market opportunities.

### In-House Performance

As of March 31, 2022, the yield on the in-house portion of the General Portfolio was 0.521%. A three month rolling average of this benchmark for this period was 0.09% with the average days to maturity at 218 days. The average days to maturity for the portfolio was 530 days.

### In-House Performance vs. Benchmark

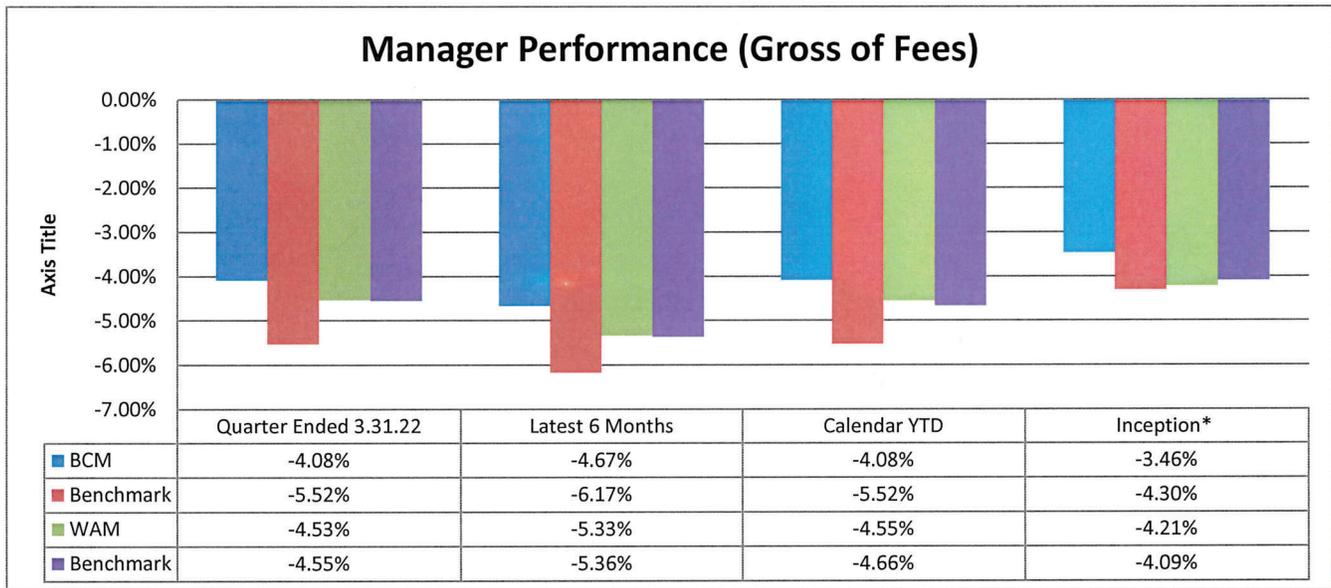

\* Benchmark is 3-month rolling weighted average of 80% 3-month Treasuries and 20% 2-year Treasuries

## Outside Manager Performance

BCM provides investment management in securitized assets, including U.S. Agency and Non U.S. Agency mortgaged backed securities, and asset backed securities. The performance of the BCM portfolio is benchmarked against the Bloomberg Barclays CMBS AAA Index. WAM provides investment management for corporate/credit securities. The performance of WAM is benchmarked against the ICE BofA 3-5 Year AA US Corporate & Yankee Index.

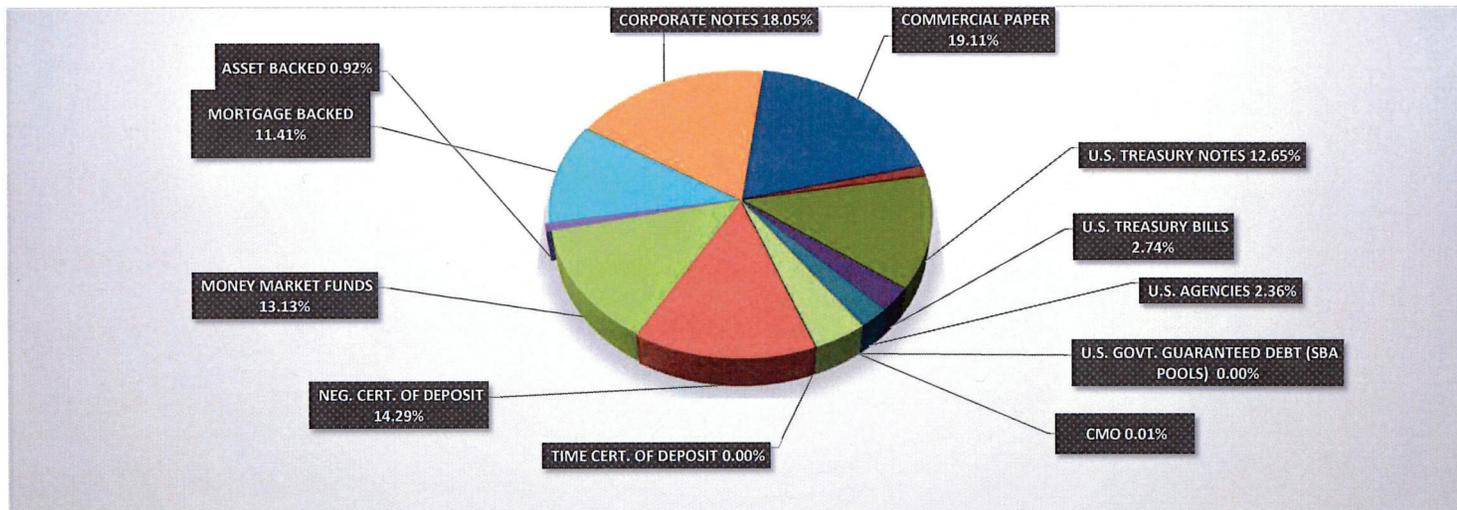

### Outside Managers' Performance vs. Benchmark

\*Inception date for BCM is October 2020 and WAM is November 2020

## Overview

The State of Nevada Local Government Investment Pool (LGIP) was established as an alternative investment program to be utilized by local governments for their public funds. This program’s operation is the responsibility of the State Treasurer who, by the provisions of state statute, has adopted guidelines for the prudent investment of these pooled funds. Any local government, as defined by NRS 354.474, may deposit its public monies into this fund for purposes of investment. As of March 31, 2022, there were 87 members of the LGIP, which includes cities, counties, school districts, and various special districts. The LGIP’s foremost investment objectives include safety of principal, portfolio liquidity, and market return, which are consistent with a conservative, short duration portfolio.

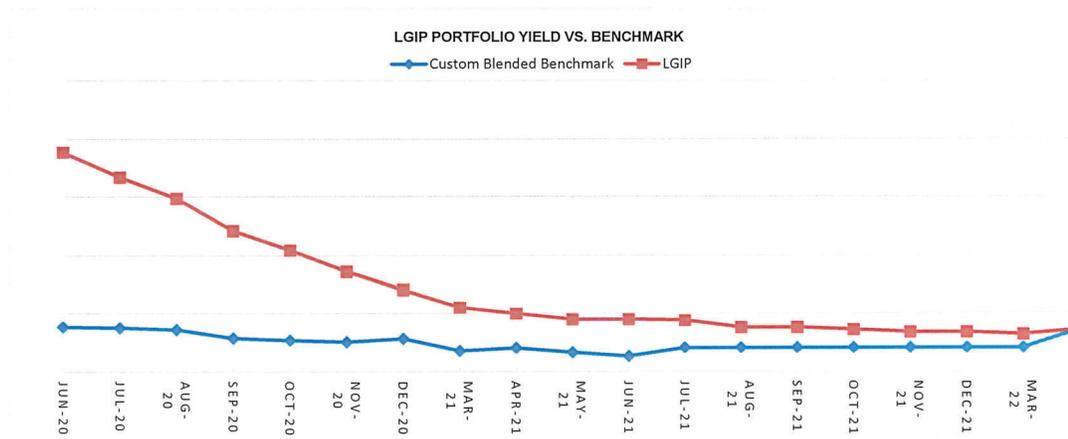

## Investment Guidelines

The permissible investments of the LGIP include United States Treasury and Agency securities, repurchase agreements, high quality commercial paper, negotiable certificates of deposit, foreign notes, international development notes, municipal bonds and banker’s acceptances. These securities are diversified to prevent over-concentration in a specific maturity, a specific issuer, or a specific class of securities. The average maturity of the portfolio must not exceed 150 days, and no single security may be longer than two years.

The State Treasurer maintains a conservative investment strategy, which incorporates the matching of maturing securities to the cash needs of the participants. Approximately 13.4% of the fund matures on a daily basis, ensuring sufficient liquidity to meet both anticipated and unanticipated withdrawals. Additionally, approximately 61% of the fund matures within 90 days, compared to the policy requirement of 50%. This requirement minimizes the risk that the market value of portfolio holdings will fall significantly due to adverse changes in general interest rates.

## Performance

FHN Financial began managing the LGIP portfolio in July 2015. As of March 31, 2022, the LGIP's portfolio yield was 0.18%, and the blended benchmark was 0.17%. The average days to maturity of the LGIP portfolio was 137 days.

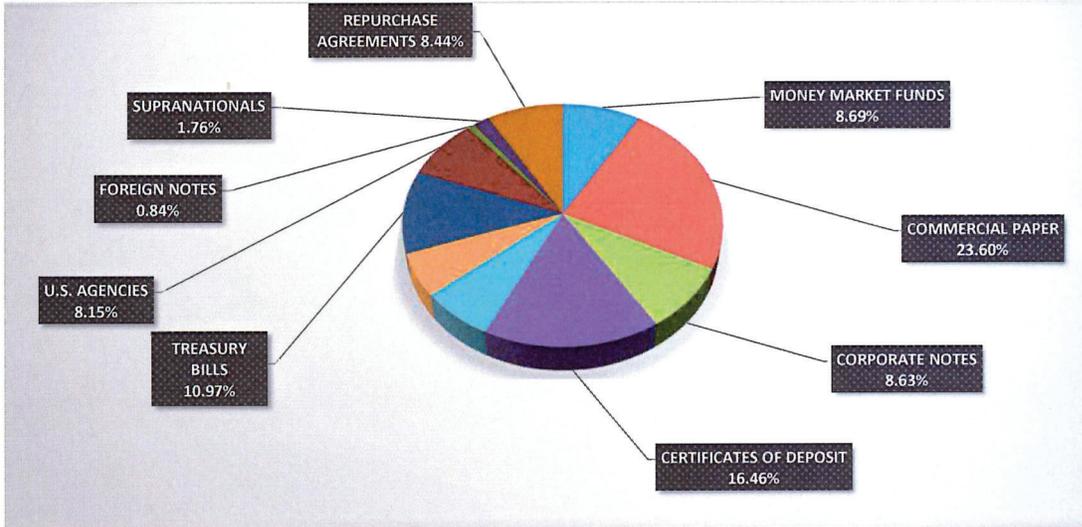

\* Benchmark is 3-month rolling weighted average of 55% Dealer Commercial Paper 150-Day Index, 30% Agency Note 180 Day Index, and 15% Dreyfus Institutional Preferred Government Money Markey Fund.

\*\*Benchmark was updated July 2020. This graph represents that change. June 2020 and prior shows the old benchmark.

**Administration**

The State Treasurer has adopted an Investment Policy relating specifically to the LGIP. The State Board of Finance shall review and approve or disapprove the policies established by the State Treasurer for investment of money of the LGIP at least every four months. The State Treasurer hereby confirms all LGIP investments are in compliance with the Terror-Free Investment Policy and the Divestiture Policy. The State Treasurer may contract with an independent auditor to review LGIP transactions for accuracy and fairness in reporting.
